

# FETS Laser Status 17.04.2013

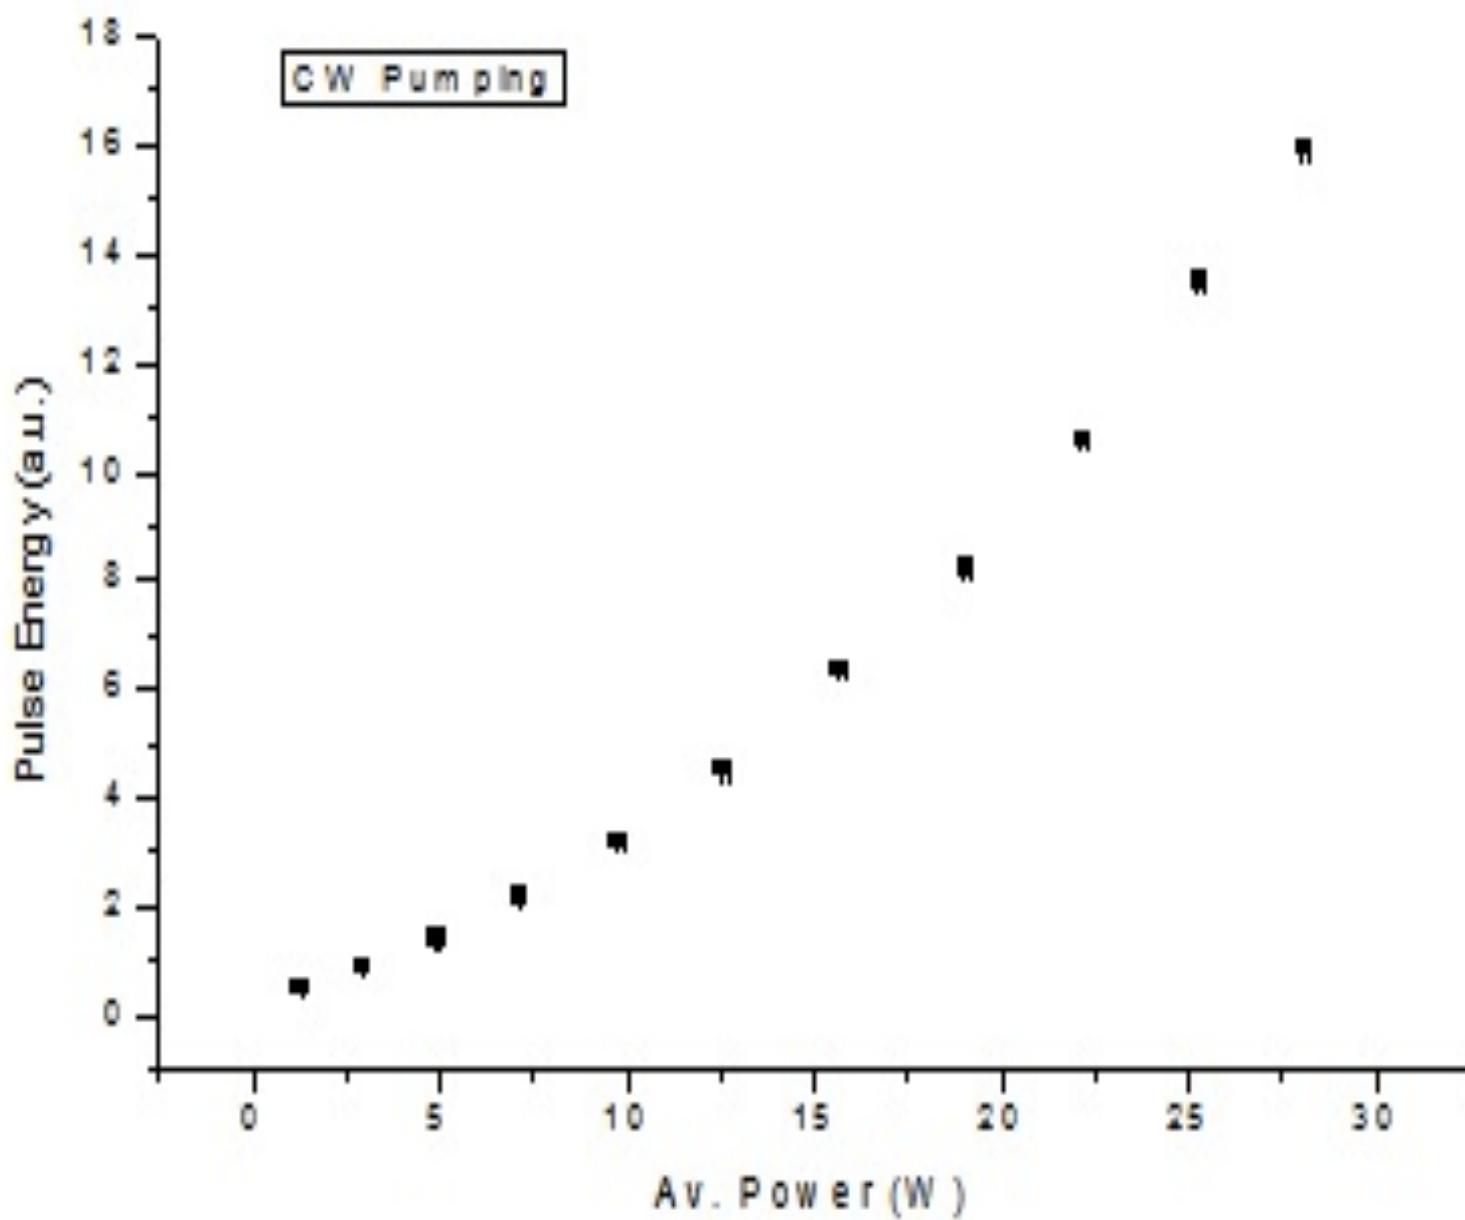

Christoph Gabor, Alessio Bosco, Stephen Gibson

- Fibre laser has returned from Manlight, France and initial tests conducted this week at Royal Holloway to assess performance after repair.
- Average power measured directly at output from laser and then after beam splitter while sampling pulses with a fast photodiode.

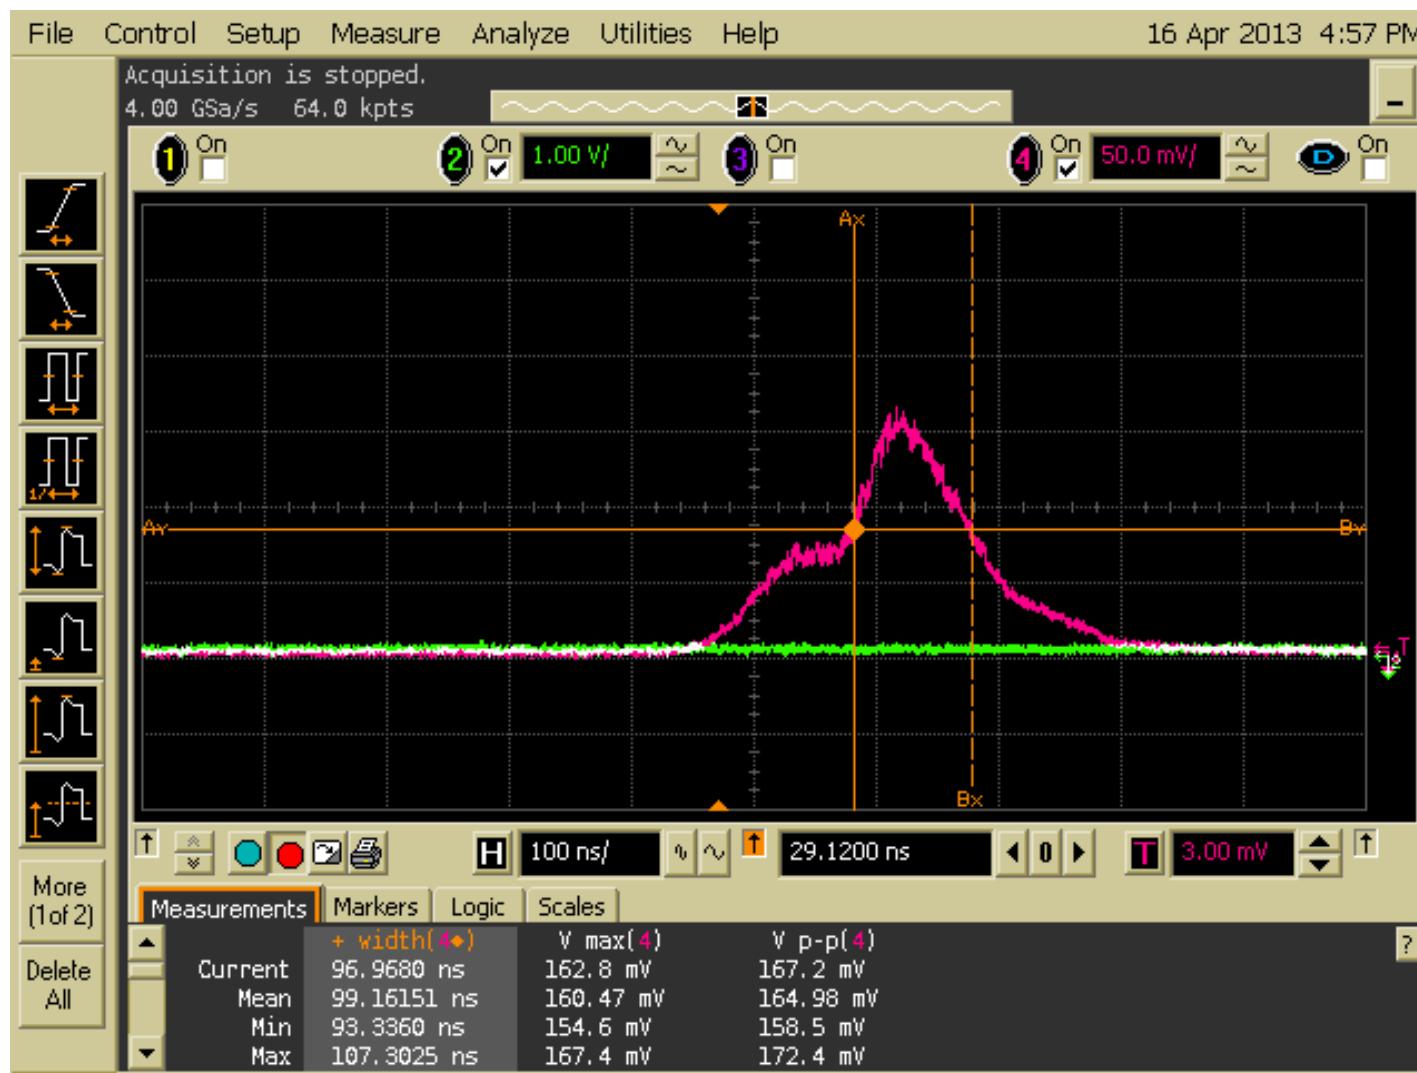

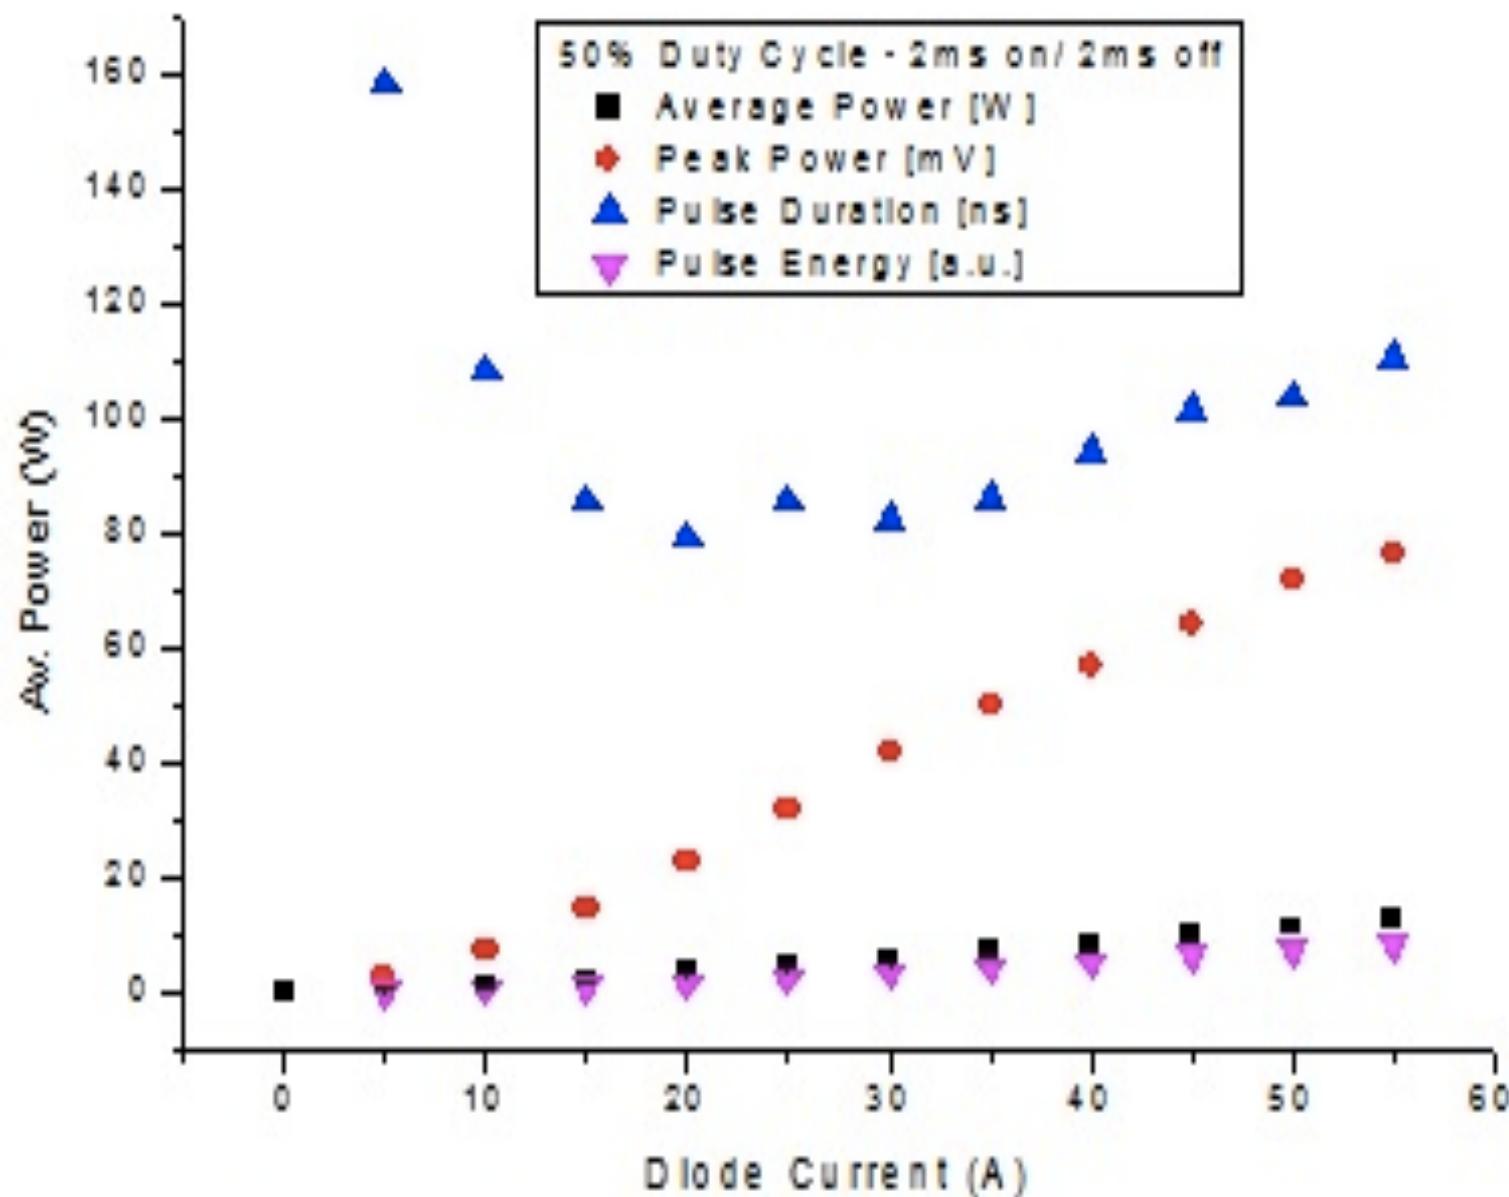

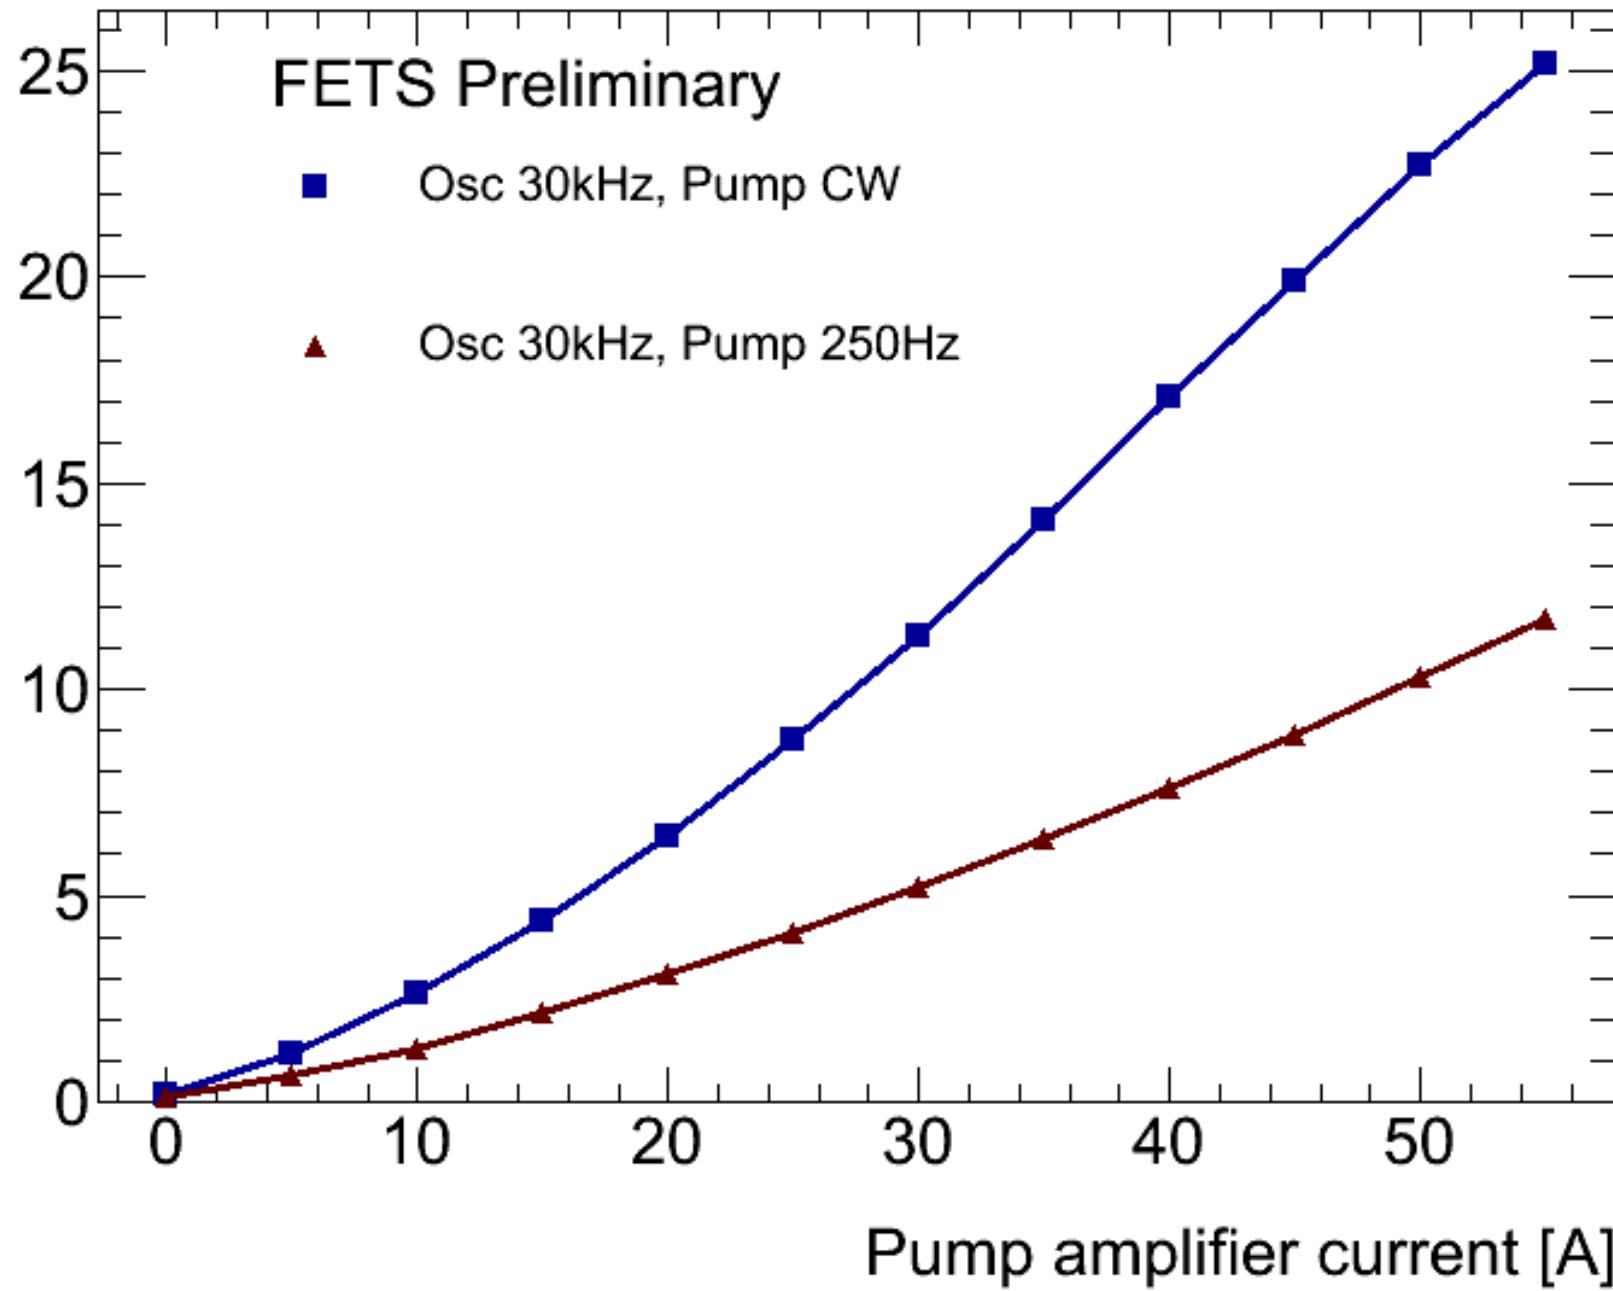

# Pulse Profile @ 55 A Diode Pump Current

## Diode pump in CW regime

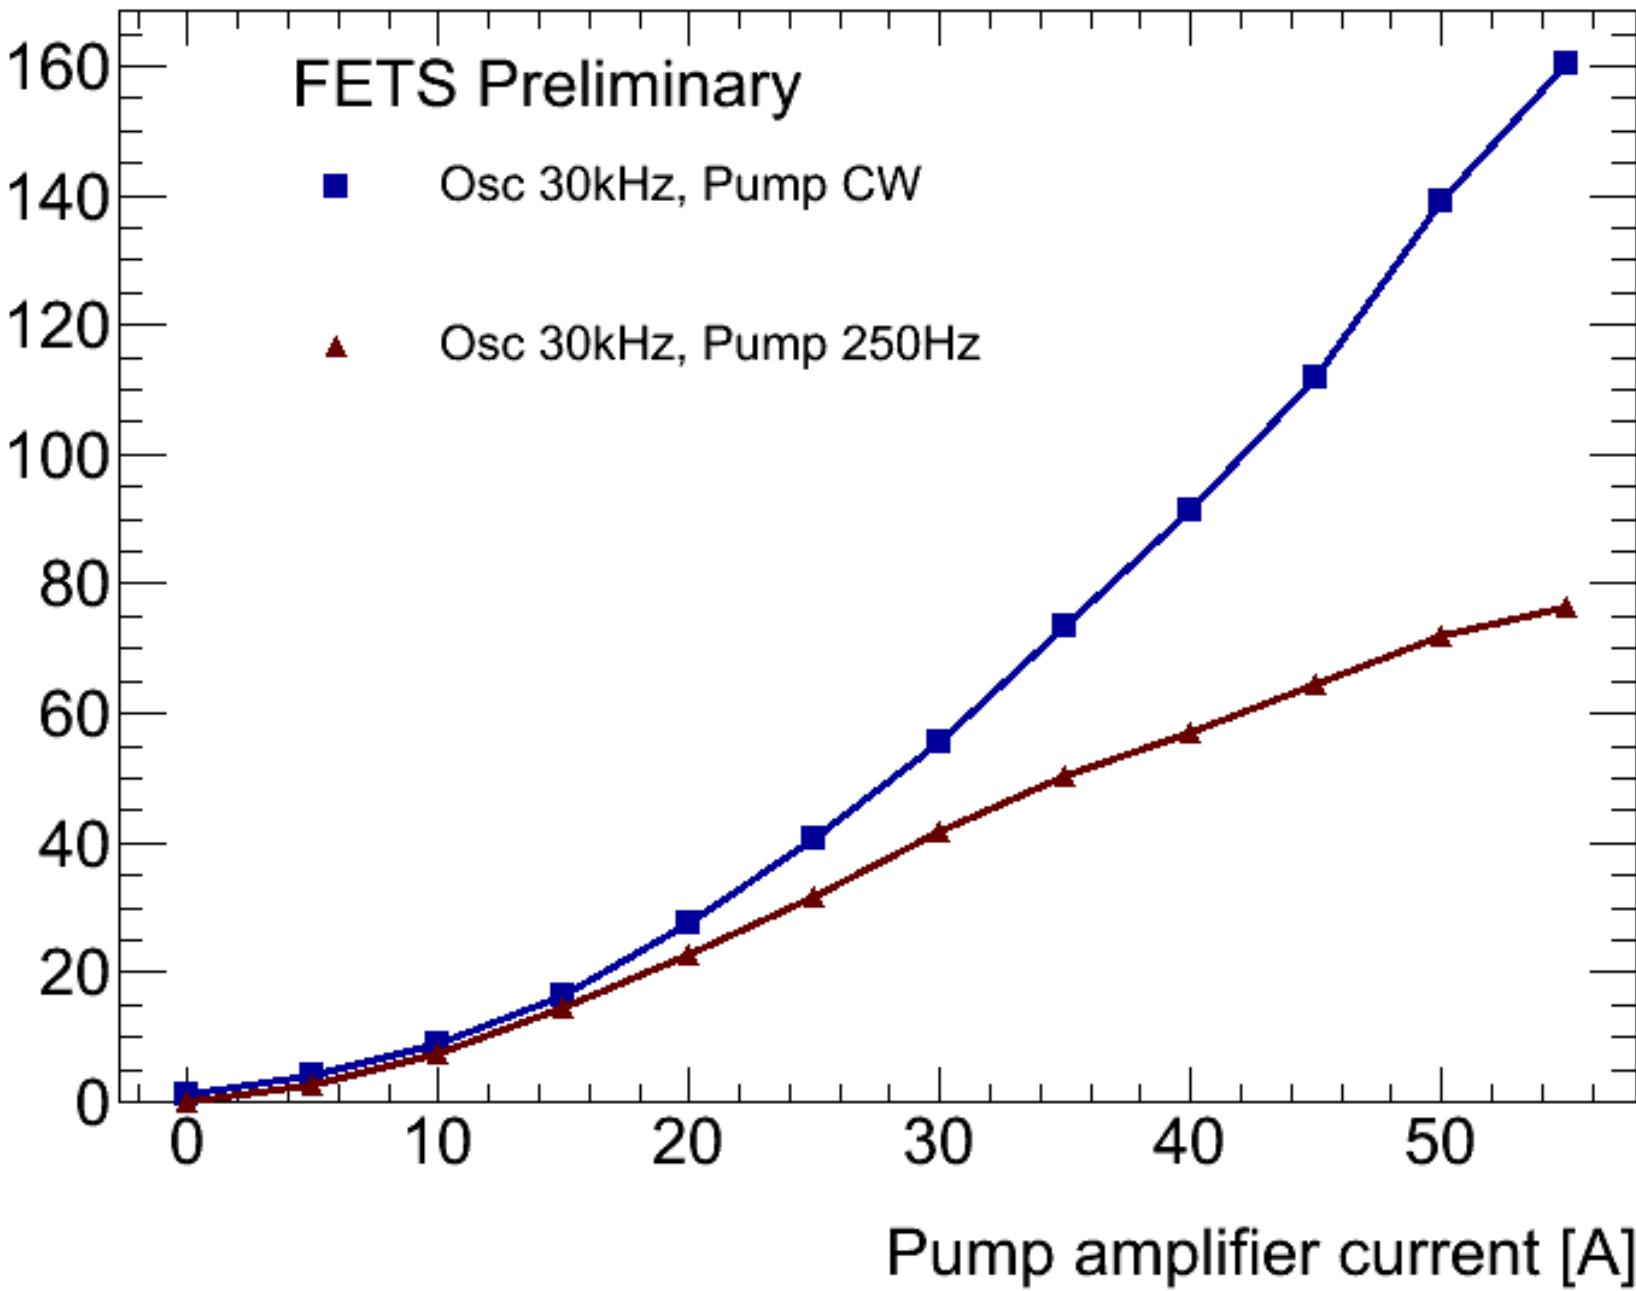

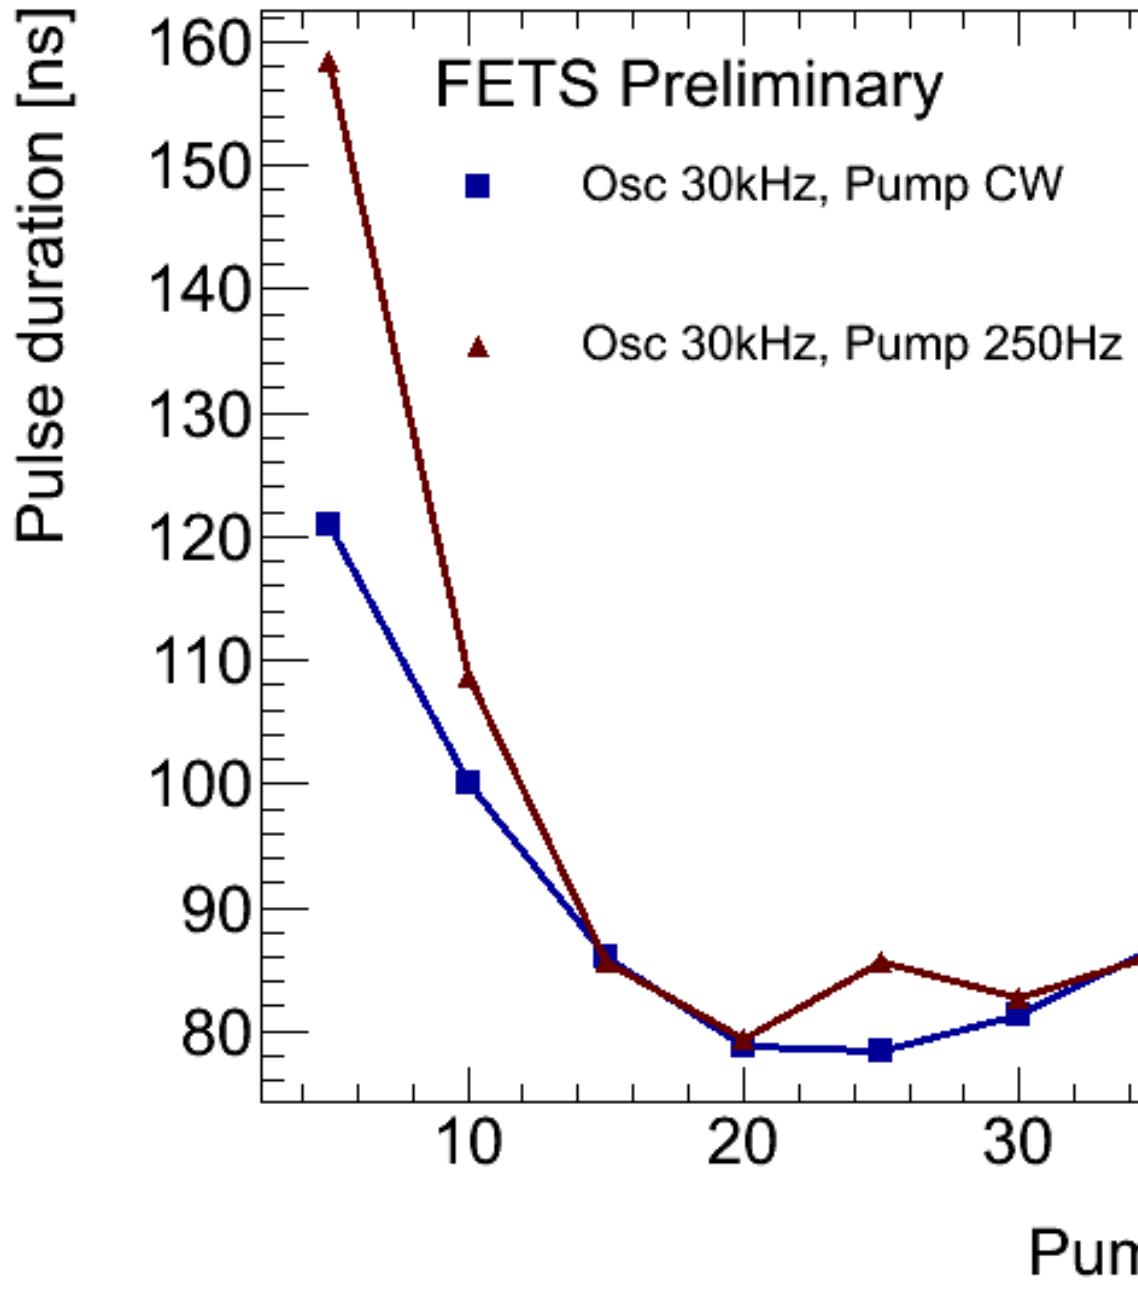

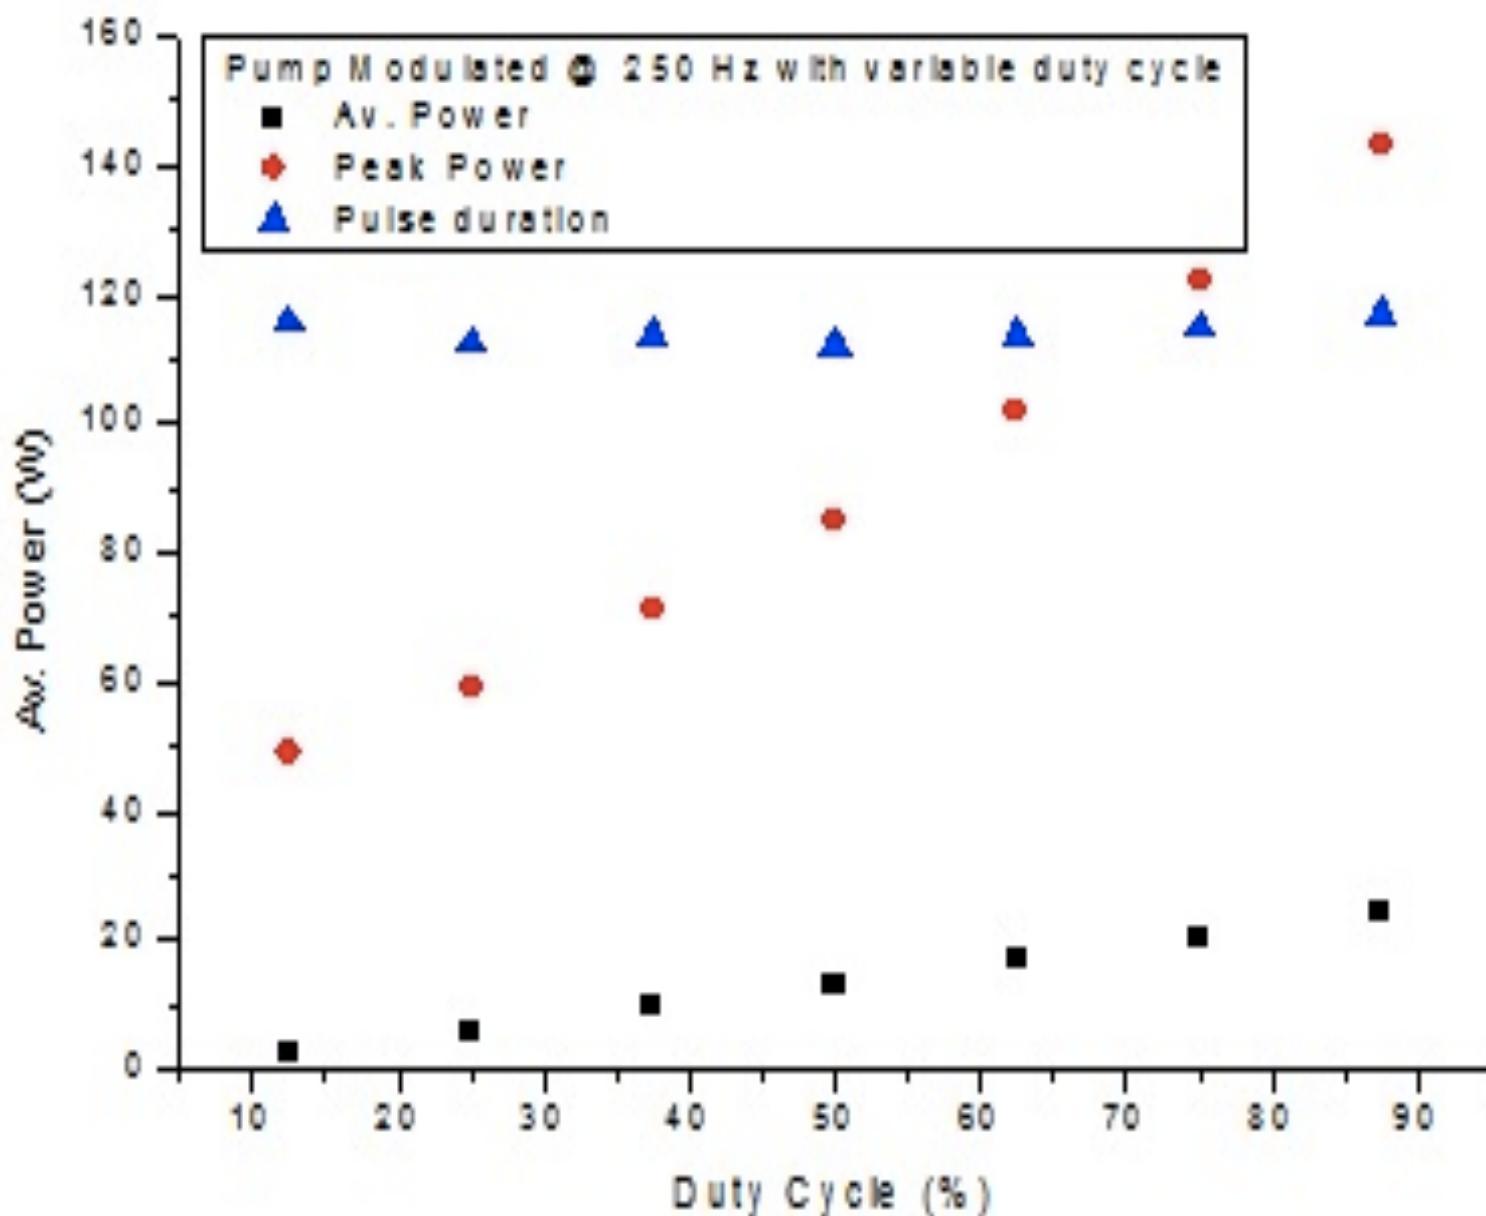

Average Power (after sampler) [W]

Peak Power (at sampler) [mV]

Acquisition is stopped.
